TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: The access road and location have been recontoured but have not established vegetation. The entire location is mostly bare of vegetation and there are areas along the access road that are bare. The location and areas along the access road must be reseeded to establish a uniform vegetation cover reflective of the surrounding reference area. Ensure soils are properly decompacted to a depth of 18 inches and suitable for vegetation establishment.

Corrective Action:	Comply with 1004 Rules	Date	02/06/2021
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS which reflects the reference area. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	11/06/2020
