**General Comment:**PA Inspection

11/10/2020 Pumper and operator called/emailed to say that tubing anchor is stuck. Inspector called engineer (SW/COGCC) who said it was ok to cut it off as long as they are still in cement (3900' calc). Pumper and operator called/emailed back to say that they cut tubing at 4553' and would set CIBP at 4550' in the morning. SW approved.

11/11/2020 BrandX wireline could not get CIBP past 2851'. Plan was to set a mechanical CIBP on tubing but could not get past 2851'. Per SW/COGCC, they can run tubing down to 4550' and set a cement plug (20 sxs) adn tag.
