Comment: There was additional material placed on the embankment near the wellhead however, the material is not stabilized and is susceptible to erosion. The embankment will need to be stabilized with BMP's for an engineered long-term solution. The erosion along the access road has not been repaired. Straw bales were installed along the roadside however, the bales have failed and are not sufficient. BMP's must be implemented and maintained in accordance with good engineering practice.

Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)C
