General Comment:

On 11/20/2020 Catherine Roy conducted a followup reclamation and stormwater inspection. Corrective actions from previous inspections are not addressed. Location is being referred to enforcement.

-Final reclamation needs to be conducted per COGCCs 1004 reclamation rules. Document 400650328 describes plugging the well on 7/21/2014. Final reclamation should have been conducted no later than 7/21/2015.

-Stormwater BMPs and erosion controls such as mulch, blankets, etc are needed throughout the project area, until stabilized with desirable perennial vegetation. Original corrective action for stormwater with a corrective action date of date 8/9/2018 is not addressed.

-Operator is directed to perform corrective actions outlined on this inspection report immediately. Corrective action dates are not assigned as it is the expectation that the location be at or near completed final reclamation when inspection is conducted.

See below, and attached photos for additional detail.
