COMPLETED INTERVAL REPORT

The completed interval Report, Form 5A, shall be submitted within thirty (30) days of completing a formation (successful or not), when a formation is temporarily abandoned or permanently abandoned, for a recompletion, reperforation or restimulation, or when a formation is commingled. Fill out a section for each formation. Attach as many pages as required to fully describe the work. List in order of completion.

**Comment:**

This form is being submitted to correct production reporting, perforation depths and number of holes on the scout card, prior to P&A. Permitting request. There was a Nio re-frac in 2008 and unfortunately there were MANY errors on the 5A submitted at this time. The biggest error is the date of first production for both Nio and the Nio/Codell, because it claimed it was in 2008 when the re-frac happened, ignoring the original Nio completion date in 2004. Documentation and details of the work performed is included in these attachments.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
