Comment: **It has been approximately 3.5 years since the Operator first recontoured and seeded the location (FIRR Doc.# 401293775). Location is not reflective of reference area vegetative cover and composition, as a number of bare patches were observed and annual, weedy vegetation has established. This location is not progressing towards achieving Final Reclamation vegetative standards after 3.5 years. Refer to the attached inspection photos.**

Corrective Action:	<p>Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Revegetation activities shall be complete before the next growing season and no later than 3/15/2021.</p>	Date	03/15/2021
