General Comment:

This is an alternative means inspection regarding the following corrective actions from inspection #696202116:
603.f: Good Housekeeping.

This inspection is also being submitted to allow modifications to the following corrective actions:
1002.e: Surface Disturbance Minimization.

Refer to the "Good Housekeeping", "Reclamation", and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

FIR #696202116 documented that two parallel access roads (leading south of the the CC 0604-1 Pad, and north to the Cascade Creek 697-04D) did not comport with Rule 1002.e and required their reclamation. After additional review of the access roads with the Reclamation Supervisor, it was noted that the eastern access road southeast of the Location had been expanded further east, and the original access road was not recontoured/regraded and reclaimed. See photos 2-3, 9-10. This inspection is to modify the original corrective action from FIR #696202116, to also include reclamation for this area of the road. The original CA date will remain applicable.

Corrective Action

Comply with 1002.e rules. Conduct reclamation on the additional access road traveling from the southwest of the CC 0604-1 Pad, the additional access road traveling from the northwest of the CC 0604-1 Pad to the Cascade Creek 697-04D Location, and the former access road southeast of the CC 0604-1 Pad left during eastern expansion; Conduct reclamation including, but not limited to, compaction alleviation, recontouring/regrading and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage areas until Final Reclamation has passed.
