01/20/2021 01:10:47 PM

A photograph showing a close-up of a dark, coarse-grained gravel surface. A large, dark green leaf with serrated edges is positioned horizontally across the middle of the frame. Below the leaf, a small, bright pink and blue object, possibly a piece of tape or a small toy, is visible. A shadow of the leaf and the object is cast onto the gravel. In the bottom right corner, there is white text overlaid on the image.

01/20/2021 01:10:56 PM

A close-up photograph showing two vertical rods on a dark, coarse-grained gravel surface. The rod on the right is green and extends from the top of the frame down to the gravel. The rod on the left is black and also extends from the top down, but it has a small, bright red laser dot or reflective marker near its base where it meets the gravel. The background is entirely composed of the gravel.
