INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Please refer to COGCC document number 2521261 for immediate actions taken to abate, investigate, and remediate impacts associated with the historical spill.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Please see the attached 'Spill Investigation Site Diagram' for proposed sample locations. These locations were selected in an effort to identify any soil impacts resulting from the reported spill. At each proposed sample location, two (2) samples will be collected: One between six and 12 inches below ground surface (bgs), and one between 24 and 30 inches bgs. Each collected sample will be analyzed for Table 915-1 constituents of concern, and those results will be reported in a Supplemental Form 27.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

If groundwater is encountered at any of the proposed sampling locations, Caerus will attempt to collect a representative groundwater sample for analysis and the finding will be reported in the Supplemental Form 27.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions
