2 CA# 141410

Corrective Action: Stormwater and erosion controls installed in response to 2018 reclamation inspection are not adequate. Long-term stormwater controls and erosion controls including slope stabilization measures, need to be installed to stabilize erosion within the project area. Stormwater and erosion controls need to be selected, sized, installed, and maintained according to good engineering practices. Erosion controls need to be maintained in place until bare soils on slopes are stabilized with desirable perennial vegetation. As response to 2018 corrective action is noted, a new corrective action date is assigned. This is the second corrective action for stormwater erosion at this location.

Date: 09/30/2020

Response: CA COMPLETED

Date of Completion: 01/15/2021

Operator Comment: Stormwater and erosion controls have been re-installed (please see included photos). This inspection has taken longer to complete than we would have liked due to the size and scope of work needed to stabilize the location. The other operator on this location also had a change in ownership during this process, adding to the time and complexity of completing the work.
