<p>COGCC Inspection Report Summary</p> <p>On 1/16/21 at approximately 1400 I, Inspector Justin Medina conducted an on-site inspection at:</p> <p>Well Name- Scheid Cooksey 1</p> <p>Company Name- Smith Energy</p> <p>API- 05-123-08344</p> <p>In Weld County Colorado.</p> <p>While there, I observed PR well</p> <p>During this inspection the following possible compliance issues were observed:</p> <p>Separator line froze and burste. At time of inspection company representative was on location addressing issue.</p> <p>Control and contain spills/releases and clean up per COGCC rules. Contact COGCC EPS staff. 2/17/21</p> <p>A follow up on this site inspection needs to be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.</p> <p>At time of inspection company representative was actively addressing line leak with vacuum truck, and other equipment. Company representative informed me that the leak was only produced water at that point. Hydrocarbon smell was present while on location by separator. I informed the company representative that they will need to file a form 19 to inform the COGCC of the issues on location, and was told they will perform this when they are done containing the issues.</p> <p>At time of inspection weather conditions were cold, overcast, recent snow, slight wind.</p> <p>At time of inspection unable to access wellhead due to vacuum truck blocking entrance, electrified cattle fence, and cattle near entrance to access road.</p> <p>This is a summary of inspection report.</p>	medinaj	02/17/2021
