General Comment:

On 3/1/2021, Reclamation Specialist Trujillo conducted an interim reclamation and stormwater inspection at Caerus Piceance??s CHEVRON-66S96W 4SWSW location in Garfield County, Colorado.

The following compliance issues were observed during this inspection:
 1002.f: Stormwater.

Refer to the "Reclamation" and "stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment Though there are areas on the south end of the pad that don't appear to be needed for production, the pad has been reasonably reduced. Interim areas appear to be progressing towards COGCC 1003 standards; desirable perennial vegetative establishment evident though undesirable weedy plant species such as cheat grass is prevalent throughout the interim areas. Evidence of heavy grazing pressure on interim areas also observed and may hinder reclamation progression.

Comment: It was observed in this inspection that stormwater and erosion control measures to stabilize production area and prevent off-location sediment transport during wet conditions have not been maintained in proper functioning condition; rutting and tracking issues observed.

Corrective Action: Comply with Rule 1002.f and implement required stormwater and erosion control measures. Ensure BMPs are adequate for the site's conditions, are installed in accordance with good engineering practices and maintained in proper functioning condition.
