General Comment:

COGCC Inspection Report Summary

On Wednesday 3/17/2021 at approximately 1400, I, Inspector Scott Ramsey, conducted a routine inspection at TEP RU 13-6, at Location # 324106 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. Limited storm water inspection due to snow cover. This location is within or in close proximity to a CPW Density/High Priority Habitat, Black bear, NSO Habitat and Wildlife Management Area.

This location is also within the 317B buffer.

During this inspection the following possible compliance issues were observed:

1. Tank battery signage does not meet requirements of new rule 605.e
2. No evidence of tracking control BMP's
3. Location and lease road show signs of lack of stabilization/compaction.
4. Unused equipment (tank next to well heads not hooked to anything and no quantity labeled)

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
