TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: The fence at beginning of the access road has not been installed back to the original position. It appears the reclamation and seeding was unsuccessful. There is insufficient desirable vegetation establishment and the location consists mostly of undesirable weed vegetative debris. The undesirable weeds need to be controlled and additional seeding will need to be performed to re-establish perennial vegetation cover. An extended corrective action date is provided to assess the location and to perform additional reclamation.

Corrective Action:	Comply with 1004 Rules.	Date	05/15/2021
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS which reflects the reference area. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed.	CostaR	03/22/2021
