**General Comment:**Accident Inspection

Operator contacted inspector at ~8:30 am, Friday, 3/26/2021, about a fire at this well and associated tank battery that had started at ~5 am. According to the operator, a nearby landowner contacted the Last Chance Fire Department, SW Washington County Station 3, sometime after 5 am on 3/26/2021, and they left at ~7 am. The fire was mostly contained between the well deadmen (a small part of the fallow crop field to the the SW and some grass to the NW were also burned). The electric control panel at the pumping unit was burned and on the ground because the post it was attached to was split. The 300 bbl AST crude oil tank was burned with fire coming out of the thief hatch at time of inspection but was considered all but empty by the operator. The partially buried 200 bbl fiberglass, fluid collection tank was burned to the ground level. The tank heater (run by propane) was not turned on. According to the Morgan County REA person, the fuses at the associated power pole at CR L were "sizzled" at 0551 hrs that morning per his computer records and so he was called out. The operator will submit a Form 22 to COGCC and COGCC will fly a drone to further investigate the fire. See attached photos.

**Inspected Facilities**

Facility ID: 234305 Type: WELL API Number: 121-06415 Status: SI Insp. Status: SI

**Idle Well**

Purpose:  Shut In  Temporarily Abandoned Reminder: \_\_\_\_\_

Comment:

Corrective Action:  Date: 03/30/2021
