**General Comment:**

COGCC engineering integrity inspection performed on April 1st, 2021 in response to initial form 19 spill report Doc #402644033 received on 03/30/2021 that outlines: Lease operator observed surface soil staining in the vicinity of a buried flowline. Associated flowline was immediately shut in. Details regarding the flowline release are unknown until excavation activities can expose flowline.

Corrective Actions identified during this field inspection are outlined in the flowline section of report. Photos uploaded.

COGCC Rules(check all that apply)

1101. Installation and Reclamation  1102. Operations, Maintenance, and Repair  1103. Abandonment

Comment: COGCC Integrity Inspection performed on 1/21/2021; No KPK personnel were on location at time of field inspection. The Camenisch #1 well was observed shut in at wellhead (No OOSLAT/ tagout). Stained soils on the ground surface from the off location flowline release were observed; No initial spill response/ cleanup has been performed. The release is located approximately 500' SW of the wellhead; 150' N of battery (40.073490, -104.866545). Excavation work to expose the failed flowline has not been initiated; remediation work and flowline repairs are pending.

Corrective Action: Provide information requested below to COGCC Integrity Inspector (via email) and add to Corrective Actions section of COGCC supplemental form 19 spill report (pertaining to compliance of COGCC series 1100 flowline regulations):  
 1) Outline root cause of failure resulting in spill (1104.k. Integrity Failure Investigation/ operator determination)  
 2) Measures taken to prevent a recurrence of failure (1102.I Corrosion Control)  
 3) Description of flowline repair/replacement work completed (1102.j. Repair)  
 4) Perform flowline pressure testing to verify integrity of repairs/ reconnections completed prior to returning well to service (1102.j.4 and 1102.O). Contact COGCC Integrity Inspector with schedule of repair work and pressure testing. Upload flowline pressure testing chart/ data to COGCC Form 19 subsequent.  
 5) Ensure OOSLAT (valves tagged out) in place to prevent unintentional release per 1102.j.7 (prior to and during time of repair).
