Inspected Facilities:

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
477774	SPILL OR RELEASE	AC	09/08/2020		-	Haudrich #2 Flowline	EG

General Comment:

This is an environmental inspection. Any corrective actions from previous inspections that have not been addressed are still applicable. There were no operator or contract environmental personnel on location at the time of this field inspection. Photos attached to document site conditions. Photo attached indicates no investigation of spill has been performed by operator and impacted soils remain at the site with no physical controls to minimize migration or transport of impacts. As noted in previous inspections of 09/24/2020 (691201349) and of 02/17/2021 (697601224) and of 03/10/2021 (697601230) the spill has not been investigated or remediated at time of this inspection which indicates Operator is in violation of current and previous rules with respect to spills. Previous rule required that in accordance with Rule 906.a Operators shall investigate, clean up, and document impacts resulting from spills/releases as soon as practicable. Current rule rule 912.a.(1) and 912.a(2) require that operators control and contain spill to protect and minimize adverse impacts to public health, safety, welfare, the environment and wildlife resources and that operators will investigate, clean up, and document impacts resulting from spills as as the impacts are discovered.
Date

Inspected Facilities

Facility ID: 477774 Type: SPILL OR API Number: - Status: AC Insp. Status: EG

Environmental

Spills/Releases:

Type of Spill: OIL Estimated Spill Volume: _____

Comment: spill discovered by third party and reported by operator on 08/29/2020. Attached photo indicates no investigation or remediation efforts have been conducted at site of spill 477774. Rule 912.a(1) requires that Operators will control and contain the Spill or Release to protect and minimize adverse impacts to public health, safety, welfare, the environment, and wildlife resources. rule 912.b(2) requires that Operators will investigate, clean up, and document impacts resulting from Spills and Releases as soon as the impacts are discovered.

Corrective Action: corrective action date is carried over from previous inspection as the corrective actions have not been initiated or performed at time of this inspection. Comply with rule 912.a.(1) and 912.a (2) and submit supplemental form 19 documenting compliance with these rules including a photo log and records of waste removed from site for transport and disposal Date: 02/27/2021
