Gentlemen,

Thank you again for your time today with discussing the project details for the West Riverside State 1 (123-11492).

To recap our discussion:

- When the West Riverside-State 1 was located for the survey and site pictures were completed to submit with the Form 6 NOI, the casing was found to be bent over to nearly 90 degrees.
- As a result, we will need to dig around the casing to a depth where it is vertical, weld on a slip joint, and bring the casing up to surface.
 - Bonanza Creek respectfully requested to be onsite tomorrow, April 16th 2021 to start the excavation around the casing, weld on a slip joint, and the bring the casing up to surface.
 - No Form 42 is required for this work
- Once casing has been brought up to the surface, Bonanza Creek is planning to build the pad 150'x150'.
 - Bonanza Creek respectfully requested to start work as soon as the casing has been brought up to the surface
 - James Hix discussed the location is not within HPH and no Building Units are in the area
 - No Form 42 is required for this work
- Nick McFarland requested an update to our Form 6 NOI and WBD.
 - Sheldon is working on this and will have this data back to the Regulatory team today (4/15/2021)

- Nick will push the “In-Process” Form 6 NOI (Doc # 402620606) back to draft this afternoon or tomorrow
 - Once the Form 6 NOI is approved a Form 42 for a MIRU is required to P&A this well
 - Once the well has been P&A’d a follow up Form 42 is required to acknowledge that the COA has been addressed (This must be done prior to the Frac of the State Antelope 34-24 wells)
- Bonanza currently has the P&A project scheduled in the next couple of weeks.

Please let us know if you agree or have any questions or edits to these notes.

Thank you,

Kate Miller
