Comment Interim reclamation of areas not reasonably needed for production appear to have been conducted in accordance with COGCC 1003 requirements; interim reclamation in process. It was observed, however, that vegetation on the eastern slopes is not establishing as quickly as other interim areas; additional seeding activities may be required on eastern slopes to achieve uniform establishment.
Continue to monitor and manage interim area until site receives a passing final inspection. Conduct additional reclamation as needed to ensure site progresses towards 1003 standards.
