Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

A compromised polyflow produced water dumpline released a currently unknown volume of produced water to the ground and subsurface. The cause and exact volume of the release are being investigated and details will be included in a supplemental report. The impacted soil will be removed following utility locates. Confirmation soil samples will be collected and submitted for laboratory analysis in compliance with COGCC Table 915-1.
