**Operator Comments:**

Noble's requests an increase in equipment on the D01-03 Multi location to allow the location to serve the following locations: 459762, 459534, 459867, 459893

The equipment addition will not impact the approved Cultural Distances, the nearest Building Unit is over a mile away from this location.

**Proposed Cultural Distances:**

Building: 5280'

Building Unit: 5280'

High Occupancy Building Unit: 5280'

Designated Outside Activity Area: 5280'

Public Road: 5280'

Above Ground Utility: 3557'

Railroad: Feet 5280'

Property Line: 173'

School Facility: 5280'

School Property Line: 5280'

Child Care Center: 5280'

The approval of this equipment addition will eliminate the need to construct the approved facility on the D02-02 Multi location (Loc ID 459534). The D02-02 location will still be constructed for the development of the approved wells. The elimination of the approved facility at this location will Noble to eliminate approximately 11.8 acres of disturbance during construction of the D02-02, some of the area approved for the placement of the facility at the D02-02 location may be constructed if needed for safety reasons during operations.

Noble is able to add the requested equipment addition without increasing the overall footprint of the approved facility at the D01-03 Multi location.

The D02-02 Facility is located approximately 4,498' away from the nearest building unit. The proposed centralized location at the D01-03 Facility is approximately 5280' + away from the nearest BU. Increasing the distance from the facility edge of disturbance to the nearest BU. The current plan is to bring in electrification (Xcel Energy), so lowering air emissions will occur. However, the utilized of electricity is dependent upon Xcel Energy schedule and construction activity. Noble will work with Xcel to hopefully utilize electricity at this location. Truck traffic that would have serviced the D002-02 Facility will be eliminated.

Approximate Reduction trip counts eliminated as a result of not constructing the D02-02 facility:

Construction: 45 trips/day –20 days

Assembly: 25 trips/day – 20 days

Automation: 10 trips/day –20 days
