**Subject:** Notice of reportable release at the Watkins 30-5-5H

Diane,

Please allow this email to serve as notice for a release that was found this morning May 30th 2021 at a Crestone Peak Resources oil and gas tank battery, Watkins 30-5-5H (COGCC Location ID 429810), located at the latitude/longitude of 39.6755, -104.6022. While conducting a site visit a Crestone operator found a vehicle that had driven off of Watkins road, struck and damaged our facility to include 1 inch active fuel gas line. It is estimated that there was about a 9 ton gas release from the 1 inch line. The location was shut down at 10:07 A.M. when we discovered the damage and will remain so until all investigations are complete. No other releases or spills were discovered from the site check. A Form 19I release report will be submitted to the COGCC today.

Please let me know if you have any questions or concerns.

Thank you

**Glen Stark**
