[Past corrective actions still to be completed unless acknowledged as completed with FIRRs.](#)

[No Operator staff or contractors on site at time of inspection.](#)

[inadequate fencing around excavation at time of inspection. excavation width, length and depth approximate 37 x 49 x 15 feet](#)

Inspected Facilities

Facility ID: 478861 Type: SPILL OR API Number: - Status: CL Insp. Status: EI

Environmental

Spills/Releases:

Type of Spill: PRODUCED WATER Estimated Spill Volume: 200

Comment: Site had open excavation at site of former buried concrete vault produced water vessel without effective or adequate means of excluding entry of people, livestock or wildlife at time of inspection. Open excavation was part of site investigation and remediation project 14115 which remains open and is documented in attached photo.

Corrective Action: maintain best management practices to control and contain all spills/releases of E&P waste to protect the environment, public health, safety and welfare and the environment as required by rule 913.b(5)B.i which requires that Operators will fence or cover open remediation excavations to prevent access when sites are not attended. The site was not attended at the time of the inspection. Date: 06/29/2021
