TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: Noxious weeds remain established at site. Plants were in late stages of flowering and beginning seed head formation. Operator is advised that effective weed control usually requires several control applications, timing dictated by monitoring & application at growth stage when most susceptible to controls and before seed head maturity. Weed Contractor was working on ranch at time of inspection; there was evidence (wilting), that Location had been treated.

Inspector Name: Colby, Lou

Corrective Action:	Continue Noxious Weed control; monitoring and timing application of controls.	Date	09/15/2021
Overall Final Reclamation	Well Release on Active Location <input type="checkbox"/>	Multi-Well Location	<input type="checkbox"/>
