DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	Undetermined	Soil Samples

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Prior to closing the pit, SWN will sample the pit bottoms from the pit to determine the requirements for disposal. The pit bottoms will be removed and disposed at an appropriately permitted facility. Any water in the pits will be sampled prior to removal and disposed at an appropriately permitted facility. If sample results indicate that the water is uncontaminated stormwater/snow melt, SWN will contact the COGCC regarding the sample results, for permission to discharge water to the ground surface. Following removal of water and pit bottoms, the liner will be removed and disposed at a permitted landfill facility, consistent with the facility at which the pit bottoms were disposed. Following removal of the liner, soil samples will be taken as described in the Soil Sampling Plan (below).

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

- ☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Grab samples will be taken from the proposed locations noted on the attached aerial map. A visual inspection will be conducted when liner is removed and additional grab samples taken if field observation or screening indicates potential impacts. No composite samples will be taken/analyzed. All samples will be discrete grab samples. One sample will be tested for all Table 915-1 parameters. This soil sample will be located in the low end of the impoundment. All other samples will be tested for inorganics (EC, SAR, pH), BTEX, and TPH (C6-C36).

Proposed Groundwater Sampling
