A photograph showing a close-up of an industrial valve or wellhead assembly. The assembly is made of metal, with a prominent orange-colored section. It is situated on a light-colored, gravelly ground. A dark, irregular stain on the gravel directly beneath the valve indicates a recent leak. To the left of the valve, a portion of a green-painted metal structure is visible. The overall scene suggests a maintenance or inspection site for an oil or gas well.

Fix leak.
