Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

OPERATOR COMMENT

KPK is actively excavating and removing soil at this time, once field screening with a PID indicates all impacted media is removed, KPK will confirm with discrete soil samples. KPK anticipates this work will be done before the next quarterly update is due.

KPK will submit the results of the ground water sampling on anticipated closure documentation pending clean results.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
