General Comment:

On 7/13/2021 Catherine Roy conducted a reclamation and stormwater inspection. During this inspection the following compliance issues were observed:

- Control weeds, remove and properly dispose of flowering musk thistles by 7/25/2021.
- Remove and properly dispose of debris by 7/31/2021.
- Assess revegetation and conduct spot seeding in areas with poor vegetative cover by 11/1/2021.

See below, and attached photos for additional detail.

Comment:
-Approximately 150 flowering musk thistles observed within the project area.
-Dense Russian thistle plants and debris observed.
-Portions of the project area with dense Russian thistle are likely suppressing desirable vegetation beneath debris thatch.

Corrective Action:

Date **07/25/2021**

-Control weeds, remove and properly dispose of flowering musk thistles by 7/25/2021.
 Corrective action timing is reduced to prevent seed dispersal of noxious weeds.
 -Remove and properly dispose of debris by 7/31/2021.
 -Assess revegetation and conduct spot seeding in areas with poor vegetative cover by 11/1/2021.

Comment: Stormwater and erosion controls were assessed during this inspection and active erosion was not observed. These controls are assessed for whether they are functioning at the time of the inspection only. A determination as to whether or not they are adequate for the location over the duration of production is not made. Continue monitoring and managing stormwater and erosion controls to ensure compliance with stormwater regulations.

Corrective Action:
