FIELD INSPECTION FORM

Loc ID _____ Inspector Name: Binschus, Chris On-Site Inspection 2A Doc Num: _____

Status Summary:

THIS IS A FOLLOW UP INSPECTION

FOLLOW UP INSPECTION REQUIRED

NO FOLLOW UP INSPECTION REQUIRED

Findings:

4 Number of Comments

1 Number of Corrective Actions

Corrective Action Response Requested

Operator Information:

OGCC Operator Number: 18600

Name of Operator: COLORADO INTERSTATE GAS COMPANY LLC

Address: P O BOX 1087

City: COLORADO State: CO Zip: 80944

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

Inspected Facilities:

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
120785	GAS COMPRESSO R STATION	AC			-	Cheyenne Compressor Station	RI

General Comment:

This inspection is in response to stormwater erosion coming off the Cheyenne Compressor Station, which is impacting downgradient surface owners, including Platte River Power Authority (midstream operations), Lazy D Grazing Association, and Tallgrass Energy.

Inspected Facilities

<div style="display: flex; justify-content: space-between;"> <div style="width: 70%;"> <p>Comment: Based on historic aerial imagery, stormwater runoff from the Cheyenne Compressor Station has caused gully erosion, up to 3-4 feet deep, along a natural vegetated swale that did not previously have stormwater runoff impacts. Portions of the 3-4 feet deep gully erosion are now a safety hazard for cattle operations, has exposed buried lines from an adjacent facility, and has impacted reclamation efforts further south. Refer to the attached inspection photos (Inspection Photos Doc. 697503056).</p> <p>At the time of this inspection, there is evidence of unmanaged stormwater runoff along the southern Cheyenne Compression Station, which appears to be the majority of the concentrated flows causing gully erosion downgradient of the location.</p> <p>Corrective Action: Corrective Action #1: Repair existing stormwater BMPs and install additional BMPs along the southern Cheyenne Compressor Station following good engineering practices to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and downgradient site degradation. This would include installing temporary stormwater BMPs along the entire reach until long-term stormwater repairs can be implemented. Corrective action shall be completed by August 11, 2021.</p> <p>Corrective Action #2: See COGCC comments section.</p> </div> <div style="width: 25%; padding-left: 20px;"> <p>Date: <u>08/11/2021</u></p> </div> </div>						
<p>Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT</p>						

COGCC Comments		
Comment	User	Date
COGCC Staff, Chris Binschus, met with five Tallgrass Energy representatives, two Kinder Morgan representatives, one Lazy D Grazing Association representative and their contractor.	binschusc	07/14/2021
Corrective Action #2: Operator shall collaborate with all impacted downgradient surface owners to repair gully erosion throughout the entire reach. This would include seeding operations to establish long-term stabilization, mitigate the observed safety hazards and prevent further impacts to downgradient reclamation on Tallgrass Energy properties. Corrective action shall be completed no later than November 15, 2021.	binschusc	07/14/2021
