**Date:** Tuesday, July 20, 2021 8:44:51 PM

---

Bob,

Yes, we understand that the perimeter ditch and berm or other stormwater measures are required per the state requirements prior to construction.

It is our company policy to comply with all state requirements and we will be sure to communicate in field and with verdad personnel regarding such requirements in the future.

Thank you,

Becky Ball

Becky,

I'd like to reconfirm that the perimeter ditch and berm is the first thing we build when building a new location. This is to ensure that no sediment runs off of the construction location. This is state requirement for all pads. Please respond with a confirmation.

Thanks,

Bob Beecherl
