Comment: **The access road and location have not been recontoured. There is rock rip/rap installed along the road and culverts remain. The well site pad remains flat with an extensive unstable cut slope. There is a road that was cut to access the canyon bottom that was not recontoured. Previous corrective action was not completed per the rules.**

Corrective Action: **Comply with 1004 Rules.** Date **07/17/2019**

Comment: Areas of disturbance have been seeded and hydromulched. There appears to be insufficient stormwater controls installed. Soils are lightly hydromulched along the graded fill slope and there are only two rows of wattles installed along the approximate 250 ft. slope. The wattles were not properly trenched into the soil. Some of the wattles have become displaced and need to be repaired. BMP's must be implemented in accordance with good engineering practice and must be maintained until final reclamation is achieved.

Corrective Action: **Install or repair required BMPs per Rule 1002.f.(2)C**

Date: 07/30/2021

Pits: ☐ NO SURFACE INDICATION OF PIT
