General Comment:

COGCC Inspection Report Summary

On Friday 7/23/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a Follow up inspection at TEP Burkle A, at Location # 335540 in Garfield county Colorado.

While there, I observed normal production operations and roustabouts installing waddles at bottom of slope that has no stabilization. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection.

The C/A (Pad stabilization) from prior three inspections documents 700701965, 700702239 and 700702707 has been completed. The C/A (Erosion at pig station) STILL has NOT been addressed. This is the forth inspection for this C/A.

During this inspection the following compliance issues were observed:

1. Erosion and sediment migration (riling) behind tank batteries from previous inspections. (C/A Date 1/6/2021

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
