CORRECTIVE ACTIONS:

1 CA# 154972

Corrective Action: Remove unused equipment Date: 10/01/2021

Response: CA COMPLETED Date of Completion: 08/19/2021

Operator Comment: The Colorado Air Pollution Control Division (APCD) currently requires the use of air pollution control equipment (e.g., enclosed combustor) on all produced water and condensate storage tanks with >= 2 tpy uncontrolled VOC emissions. TEP utilizes enclosed combustors (ECD) to comply with this regulation. When uncontrolled emissions fall below the 2 tpy threshold TEP will often disconnect the ECD from the tank battery. However, due to the potential of a future increase in the facility emissions or a future reductions of the control threshold, TEP will often elect to leave the ECD in place. An ECD in this status is not "Unused Equipment", it is "temporarily out of

service." The ECD will remain in place and used as needed.
