General Comment:**COGCC Inspection Report Summary**

On Wednesday 8/18/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a follow up inspection at TEP RMV 25-20, at Location # 335236 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection.

C/A's (stabilization/compaction and tunneling at well head) from previous inspection document #692403018 have NOT been completed. Therefore C/A date remains the same 4/1/2021.

During this inspection the following compliance issues were observed:

1. Location shows signs of lack of stabilization/compaction
2. Load out lines are missing caps/bull plugs
3. Separator is lacking labels for heated baths (Glycol)

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
