**Photo 1.** Google Earth aerial imagery from 9/7/2013. Photo illustrates the current outer perimeter of the location (red line) of ~ 5.30 acres for the two drilled wells. Operator has performed interim reclamation activities; however, the size of the location can be further reduced in size. For illustrative purposes, an ~75 foot circle has been generated around the circumference of the southern well for potential workover rig space. Note- some of the southwestern area may be needed for vehicle traffic but Operator should reconsider location entrance to help further reduce the size of the southwestern area.
