**General Comment:**

Construction Inspection

Location is in pasture with dense vegetation (see background photos). Drill cutting pit was constructed per Form 15 and 27, had no groundwater, and will be lined the following day. Topsoil (loamy) piles are compacted and stored on the north, south and east sides of location (see attached photos). Access road from CR 2G is ~4 miles with gravel and cattle guards placed appropriately, including over mapped offsite gas lines.
