CORRECTIVE ACTIONS:

1 ☒ CA# 153892

Corrective Action: remove unused equipment

Date: 08/19/2021

Response: CA COMPLETED

Date of Completion: 08/19/2021

Operator Comment: The Colorado Air Pollution Control Division (APCD) currently requires the use of air pollution control equipment (e.g., enclosed combustor) on all produced water and condensate storage tanks with  $\geq 2$  tpy uncontrolled VOC emissions. TEP utilizes enclosed combustors (ECDs) to comply with this regulation. When uncontrolled emissions fall below the 2 tpy threshold, TEP will often disconnect the ECD from the tank battery. However, due to the potential of a future increase in facility emissions or a future reduction of the control threshold, TEP will often elect to leave the ECD in place. An ECD in this status is not "unused equipment", rather, it is considered to be temporarily out of service.

COGCC Decision: Approved pending re-inspection
