**Inspected Facilities**Facility ID: 219283 Type: WELL API Number: 075-06132 Status: PR Insp. Status: PR**Producing Well**

Comment: Producing, casing is disconnected from flow line and shut in with a bullplug on one side and a closed 2" valve on the other. The well head configuration suggest a packer in the well. Records show that there is no packer in the well diagram.

Corrective Action: COGCC request a M.I.T. be performed to verify casing integrity as per rule 209.a., Submit current production records and/or contact COGCC Engineering for directives.
