No	SURFACE WATER	None	Visual inspection
No	VEGETATION	None	Visual inspection

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On 2/28/21, an operator discovered evidence of a spill (stained soil) on the surface. After investigation, it was determined that the source was a leaking buried gathering line on the well pad. The line was isolated and shut in, an emergency one call was completed and a crew was brought out to excavate the impacted material and place it on a liner in wait to be hauled to disposal.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

A composite soil sample of the impacted material was obtained, results will be submitted when recieved. After excavation of the contaminated material is finished, representative, discreet samples will be taken to confirm that all contamination has been removed.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Groundwater has not been encountered during excavation. If groundwater is encountered during excavation/remediation, COGCC will be notified immediately.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

No surface water impacts, there is no surface water in close proximity of the spill or contaminated material.

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) 0

Volume of liquid waste (barrels) 0

Is further site investigation required?

The extent of the impact is not known at this time. Delineation will be completed with excavation of the impacted material and reported after excavation is complete.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The leaking gathering line has been isolated and will be repaired.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Impacted material is being excavated, and placed on a liner, to be hauled to an approved disposal facility. Due to the lateral extent of the contamination, the tank on location will have to be removed temporarily to allow to equipment to excavate underneath.
