**General Comment:**

On 9/15/2021 COGCC staff, Kris Neidel was present to observe soil sample collection and environmental inspection. Soil samples were collected from a former flare pit at the Dry Creek Federal 1-14. Weather was 78 degrees and sunny, the well is located in a small narrow, canyon. Pit facility id #480784 was created administratively to document the location of flare pit. Pit is being closed as a part of REM #19966. The following was observed: a cyclone fence with barbwire was around ¾ of the pit area. Part of the fence was removed to allow for the removal of soil from pit area. Samples were collected from the pit bottom and pit walls, soil had a strong hydrocarbon odor and staining. (see photo log for more description) There is a stockpile of soil on the pad that was reportedly excavated from the pit. The pit area is on a slope toward Sage Creek. Sage Creek is approximately 70 feet from the edge of former flare pit. Sage Creek was completely dry at the time of inspection; the pit is approximately 10 feet deep and 25feet around. The E&P waste soil excavated from the pit area is being stored on a tarp on location, this soil was sampled for waste disposal characterization. Corrective Action: comply with previous inspection Corrective Actions, within 21 days of receiving sample results of soil sampling, submit on a supplemental Form 27. See Photos.

Comment: Corrective Action: Date: **Pits:** ☐ NO SURFACE INDICATION OF PITType: FlareLined: NOPit ID: 480784Lat: Long: Reference Point: Other: Length: Width: **Lining:**Liner Type: Liner Condition: Comment: 

Pit is not currently in use, it is being closed. Pit ID was created by COGCC staff. At time of inspection, it was apparent that impact remains in soil after initial excavation. Groundwater appears to be shallow in the area

Corrective Action: 

Within 21 days of receiving sample results of soil sampling, submit on a supplemental Form 27.

Date: 11/30/2021**Fencing:**Fencing Type: SafetyFencing Condition: Comment: 

mmment: fence was removed to allow work on pit

Corrective Action: 

Action prevent wildlife from entering pit

Date: 11/30/2021**Netting:**Netting Type: Netting Condition: Comment: 

no netting
