General Comment:

COGCC Inspection Report Summary

On Monday 10/18/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus PCU T35X-2G, at Location # 335694 in Rio Blanco county Colorado.

While there, I observed normal operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

During this inspection the following compliance issues were observed:

1. Fill slope shows signs of erosion/sediment migration
2. One dead man is improperly marked
3. Chemical tank containments are full of fluid and would not be sufficient to contain possible spill
4. Lack of battery signage

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
