General Comment:

This is a reclamation inspection of the BURNHAM-DAWSON #1 well site which was plugged and abandoned on 5/10/2010.
 The location is not in compliance with the Final Reclamation Regulations.
 See attached photos and additional details within this report.

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: The access road, battery site, and well site have not been reclaimed. The soils are compacted and have not been recontoured. There are multiple abandoned pipe risers that have not been removed. The disturbed soils are not stabilized and are susceptible to further erosion. The corrective action date is set for when final reclamation was required to be completed. Corrective action needs to be performed immediately.

Corrective Action:	Comply with 1004 Rules	Date	05/10/2011
Overall Final Reclamation	Fail	Well Release on Active Location	<input type="checkbox"/>
		Multi-Well Location	<input type="checkbox"/>

COGCC Comments

Comment	User	Date
Observations at other areas in the field showed areas reclaimed using manure and or imported soils. If topsoil will be imported for reclamation then the imported material must include an agronomic soil analysis to evaluate soil suitability for reclamation. The use of manure is not advised unless it has been properly composted. The use of manure can import undesirable and noxious weeds to the site which could impact reclamation.	CostaR	10/28/2021
