General Comment:

Inspection in response to conditions seen while traveling to another location further up road. Well was being unloaded by operator. Compliance supervisor stopped and asked operators staff what work was being currently being conducted. He replied "unloading well to take water of it". No prior notice of well liquids unloading submitted. This inspection is focusd on this issue observed from public roadway.

See rules 405.s and 903.d(1), in future provide advanced notice of well liquids unloading via Form 42 for all wells within COGCC jurisdiction.

See "venting" section for CA to retroactively submit Form 42 for this well for 11/09/21.
