CORRECTIVE ACTIONS:

CA# 154558

Corrective Action: Contact the COGCC Area Engineer for next steps per Rule 912.b. Refer to the venting and flaring NTO for further details.

Date: 08/24/2020

Response: FACTUAL REVIEW REQUEST

Basis for Review: Corrective action dates are not attainable

Operator Comment: KPK was not actively flaring/venting at time of inspection. Gas was being routed from the production separator to the tank system as a result of a dump valve malfunction. During normal operations, gas would remain in separator and be consumed on location.

The dump valve was discovered to be malfunctioning on 8/5/21. A Kimray rebuild kit was installed on 8/5/21 to repair the dump valve and stop gas from being sent to the tank system.

COGCC Decision: Approved pending re-inspection

COGCC Representative: Well site facility has no meter house and no sales line to sale gas
