COGCC Rules(check all that apply)☐ 1101. Installation and Reclamation☐ 1102. Operations, Maintenance, and Repair☒ 1103. AbandonmentComment:

Improper abandonment of off-location flowlines. Flowlines were cut and left open ended with no caps installed. Open to ground water and environment. Flowlines were cut on location 3' below grade at the separator riser and at the tie-in of the new flowline. The Abandonment process has been started and should be finished per 1105 Rules. If this best practice was used on other locations we would want this corrected as well.

Corrective Action:

Complete flowline abandonments to comply with Rule 1105.
