## COMMENTS:

Investment Equipment, LLC (Investment Equipment), respectfully submits this alternative sampling request as per Rule 909.j.(6). Investment Equipment operates the Causey 10,17,20 Pit, an existing multi-well produced water pit. Four wells contribute to the produced water in this pit: the Clifford Causey #10, API # 05-001-05242; the Clifford Causey #17, API # 05-001-05299; the Clifford Causey #20, API # 05-001-05289; and the Badger Creek 22-32B, API # 05-001-09771. All of these wells are located in the Hotspur Field. Geographically, the four wells are less than a mile away from each other.

Investment Equipment proposes to consolidate the sampling program, due to the shared field for the contributing wells to this pit as well as their discrete geographic positioning, and submit a representative analysis on an annual basis.

	In a case where all wells flow multiphase fluids to a single separator at a central location the Operator can collect a produced water sample from the common separator or other shared separation equipment, but upstream of the pit.  If no other produced water sample options are available, the Operator may collect a sample from the discharge pipe into the pit.  Samples of standing or stagnant produced water already discharged into the pit are NOT compliant with Rule 909.j
