Photo 1. View of the project area from the northwestern corner facing center.

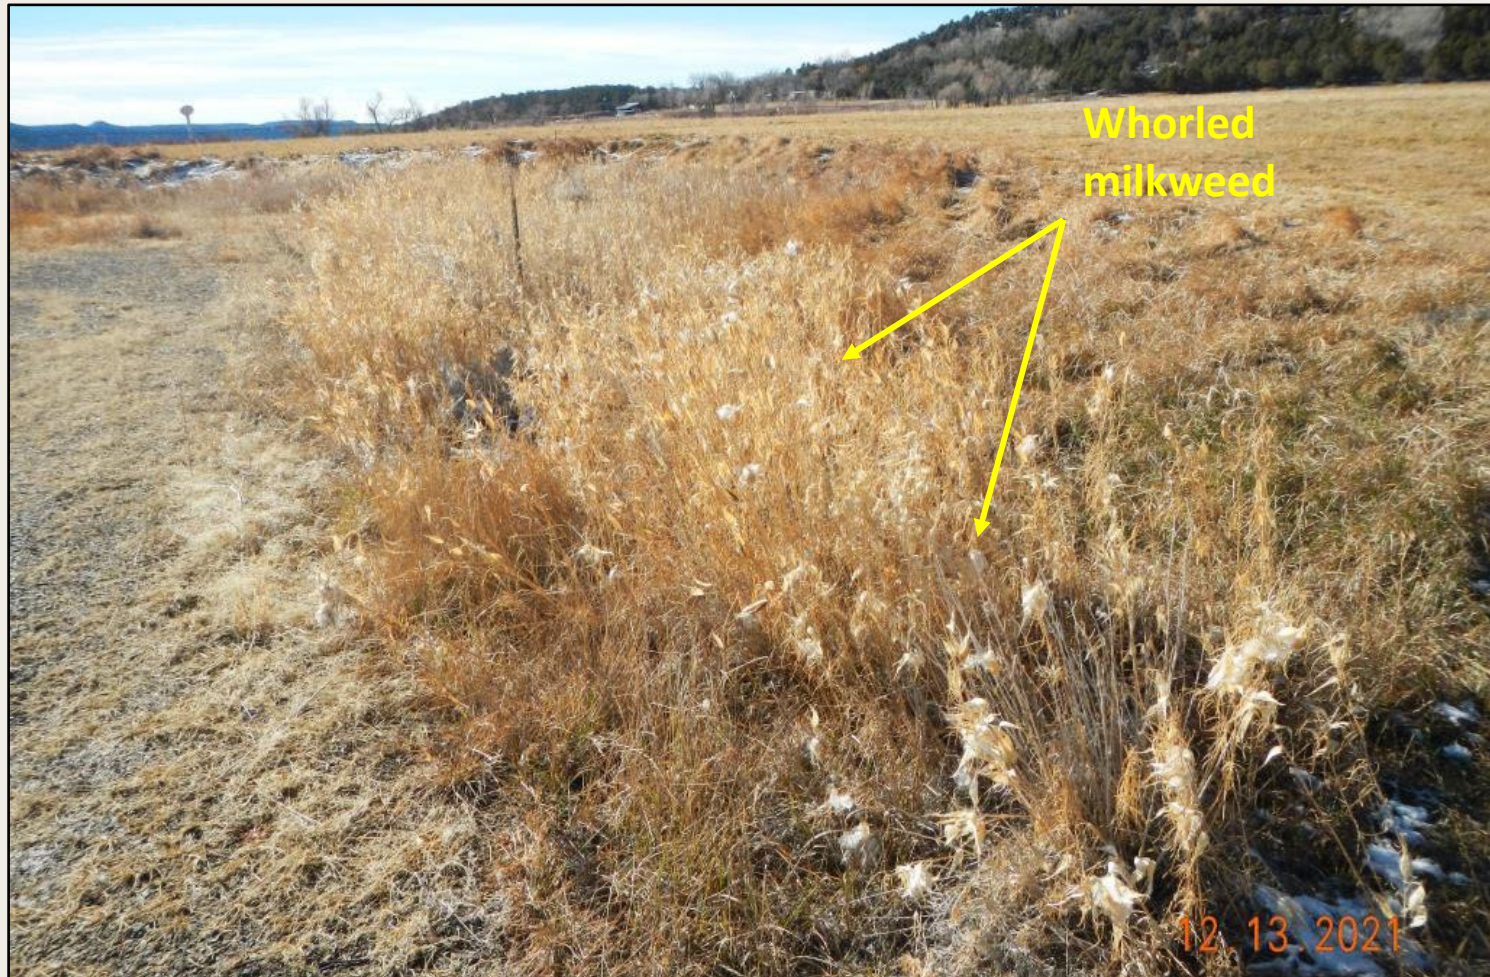

Photo 2. View of the northern project area from the northeastern corner facing westward. Revegetation is progressing with sand dropseed, western wheatgrass, smooth brome and orchard grass. Approximately 300 whorled milkweeds (*Asclepias verticillata*) need to be controlled in cropland.

Photo 3. View of the western project area from the northwestern corner facing southward.

Photo 4. View of reference area comprised irrigated grass field with irrigated grasses such as smooth brome, western wheatgrass, and orchard grass. Vegetation is largely dormant and mowed at this time.
