Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Wellhead abandonment closure sampling was completed on September 9, 2021. Groundwater was not encountered in the wellhead cut and cap excavation. Visual inspection and field screening of soils around the well were conducted following wellhead cut and cap operations and a soil sample (WH-FS-01@5') was submitted for laboratory analysis to determine if a release occurred. Laboratory analytical results did not contain any concentrations exceeding applicable COGCC Table 915-1 cleanup concentrations. A Soil Sample Location Map is provided as Figure 1. Soil sample locations, field screening results, and analytical results are provided in Table 1 through Table 4.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

- ☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

On September 9, 2021, a soil sample (WH-FS-01@5') was collected from the base of the cut and cap excavation area at approximately 5 feet below ground surface (bgs). The soil sample was submitted for laboratory analysis of TPH (total volatile [C6-C10] and extractable [C10-C36] hydrocarbons), organic compounds in soil per COGCC Table 915-1, and EC, SAR, pH, and boron (soil suitability parameters). Laboratory analytical results indicate that soil sample constituent concentrations were in compliance with COGCC Table 915-1 cleanup concentrations. A Soil Sample Location Map is provided as Figure 1. Soil sample locations, field screening results, and analytical results are provided in Table 1 through Table 4.

Proposed Groundwater Sampling

- ☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Groundwater was not encountered during wellhead cut and cap operations.

Proposed Surface Water Sampling

- ☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

- ☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

On September 9, 2021, visual inspection and field screening of soils was conducted at the base and four sidewall locations within the wellhead cut and cap excavation area. Based on the inspection and screening results, hydrocarbon-impacted soil was not observed at the soil screening locations. As such, no soil samples were submitted for laboratory analysis from these locations in accordance with the COGCC Operator Guidance for Oil & Gas Facility Closure document. Soil sample locations, field screening results, and analytical results are provided in Table 1 through Table 4. The soil sample and field screening locations are illustrated on Figure 1. The laboratory analytical report is provided as Attachment A. The COGCC Wellhead Closure Checklist is provided as Attachment B. The photographic log is provided as Attachment C.
