OIL & GAS  
CONSERVATION COMMISSION

Mr. D. V. Rogers, Director  
Oil & Gas Conservation Commission  
Room 312 - State Services Bldg.  
1525 Sherman Street  
Denver, Colorado 80203

Dear Mr. Rogers:

Received your note that Form #10 Certificate of Clearance was needed on the #2 Whitaker in order to commingle the "D" and "O" Production. The #2 Whitaker is not productive in the "D" formation and is perforated in the "O" Sand only.

It is possible that you may have desired the report on the #1 Whitaker, which is perforated in the "D" and "O" sands, but is separated by a retrievable packer set at 5000 feet. Since it is separated, I was unaware of the need for this certificate of clearance, but, in any event, I am filling out Form 10 for #1 Whitaker in order to comply if it is required. I noticed that I failed to make this clear in filling out the original Form 4. Therefore, I am also filling out another Form 4.

Since I have only one Form 10, we are sending this copy and will fill in the other two as soon as we receive additional forms. Kindly send us more Form 10 blanks, so we may comply. And we are also in need of more Form 1 blanks.

Sincerely yours,

  
Paul H. Umbach

PHU:rb

P. S. Also enclosed are the Monthly Production Reports for February and March of 1965.
