April 27, 1965

Paul H. Umbach
Pinestead, Flagstaff Road
Boulder, Colorado 80302

Dear Mr. Umbach:

I received your letter last week regarding the Whitaker wells, but I was tied up at the Oil Shale Symposium and am just getting around to answering it.

My letter of April 13, 1965, referred to the No. 1 Whitaker well. I mentioned that you had been given approval to commingle "J" and "O" production, but not to produce "D" and "O" production simultaneously.

In order to produce "D" sand gas and "O" sand oil, you must make application to this office and receive approval prior to the production of the "D" sand.

This is the same procedure as was used to obtain approval to commingle "J" and "O" production, even if the "D" and "O" are to remain separated by a packer.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION

D. V. Rogers, Director
